

(D) *Coefficient of variation.* The coefficient of variation ( $S_R$  in percent) of five replicate injections is not more than 2.0 percent. If the system suitability requirements have been met, then proceed as described in § 436.216(b) of this chapter. Alternate chromatographic conditions are acceptable provided reproducibility and resolution are comparable to the system. However, the sample preparation described in paragraph (b)(1)(i)(B) of this section should not be changed.

(iii) *Calculation.* Calculate the cefuroxime content as follows:

$$\frac{\text{Milligrams of cefuroxime per tablet}}{R_u \times X} = \frac{R_s \times X_s \times X}{d}$$

where:

$R_u$  = Sum of peak heights of the cefuroxime axetil sample isomer A and isomer B peaks/Peak height of the internal standard;

$R_s$  = Sum of the peak heights of the cefuroxime axetil working standard isomer A and isomer B peaks/Peak height of the internal standard;

$P_s$  = Potency of the cefuroxime axetil working standard in milligrams of cefuroxime activity per milliliter;

$d$  = Dilution factor of the sample; and

$n$  = Number of tablets in the sample assayed.

(2) *Moisture.* Proceed as directed in § 436.201 of this chapter, using the titration procedure described in paragraph (e)(1) of that section.

(3) *Dissolution.* Proceed as directed in § 436.215 of this chapter. The quantity  $Q$  (the amount of cefuroxime activity dissolved) is 60 percent at 15 minutes and 75 percent at 45 minutes.

(4) *Film-coat rupture test.* Proceed as directed in § 436.217 of this chapter.

(5) *Identity.* The high-performance liquid chromatogram of the sample solution determined as directed in paragraph (b)(1) of this section compares qualitatively to that of the cefuroxime axetil working standard solution.

Dated: October 29, 1987.

**Sammie R. Young,**

*Deputy Director, Office of Compliance, Center for Drug Evaluation and Research.*

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 60

[AD-FRL-3287-2]

#### Standards of Performance for New Stationary Sources; Grain Elevators and Stationary Gas Turbines; Correction

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; correction.

**SUMMARY:** This notice clarifies the applicability dates for the standards of performance for grain elevators (Subpart DD of 40 CFR Part 60, published in the *Federal Register* August 3, 1978), and stationary gas turbines (Subpart GG of 40 CFR Part 60, published in the *Federal Register* September 10, 1979). The applicability dates were inadvertently omitted from these subparts.

**EFFECTIVE DATE:** November 5, 1987.

#### FOR FURTHER INFORMATION CONTACT:

Doug Bell or Amanda Aldridge, Standards Development Branch, ESED (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541-5568 or (919) 541-5268.

#### SUPPLEMENTARY INFORMATION:

##### List of Subjects in 40 CFR Part 60

Air pollution control.

Date: October 28, 1987.

**Don R. Clay,**

*Acting Assistant Administrator for Air and Radiation.*

For the reasons set out in the preamble, Title 40, Chapter I of the Code of Federal Regulations is amended as follows:

#### PART 60—[AMENDED]

1. The authority citation for Part 60 continues to read as follows:

**Authority:** Sections 101, 111, 114, 301(a), Clean Air Act as amended (42 U.S.C. 7401, 7411, 7414, 7601(a)).

2. By revising paragraph (b) of § 60.300 of Subpart DD—*Standards of Performance for Grain Elevators* to read as follows:

**§ 60.300 Applicability and designation of affected facility.**

(b) Any facility under paragraph (a) of this section which commences construction, modification, or reconstruction after August 3, 1978, is subject to the requirements of this part.

3. In Subpart GG—*Standards of Performance for Stationary Gas*

*Turbines*, § 60.330 is revised (existing paragraph is designated as paragraph (a) and revised, and new paragraph (b) is added) as follows:

**§ 60.330 Applicability and designation of affected facility.**

(a) The provisions of this subpart are applicable to the following affected facilities: All stationary gas turbines with a heat input at peak load equal to or greater than 10.7 gigajoules per hour, based on the lower heating value of the fuel fired.

(b) Any facility under paragraph (a) of this section which commences construction, modification, or reconstruction after October 3, 1977, is subject to the requirements of this part except as provided in paragraphs (e) and (j) of § 60.332.

### 40 CFR Part 403

[FRL-3287-1]

#### General Pretreatment Regulation for Existing and New Sources; Removal Credits

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rule.

**SUMMARY:** On April 30, 1986, the United States Court of Appeals for the Third Circuit invalidated certain portions of the amendments to the removal credits regulation promulgated on August 3, 1984 (49 FR 31212). *Natural Resources Defense Council, Inc. v. EPA*, 790 F.2d 289 (3d Cir. 1986). The effect of that decision on the removal credits rule was to leave in effect the previously promulgated versions of the 1984 regulatory provisions invalidated by the court. The purpose of today's action is to amend the removal credit regulation so that it properly reflects the effect of the court's decision.

**DATE:** This regulation shall become effective November 5, 1987.

**FOR FURTHER INFORMATION CONTACT:** Craig Jakubowics, Permits Division (EN-336), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 475-9533.

**SUPPLEMENTARY INFORMATION:** On August 3, 1984, EPA promulgated amendments to the removal credits regulation, 40 CFR 403.7 (49 FR 31212). These amendments modified in part the previous version of § 403.7 that EPA promulgated on January 28, 1981 (46 FR 9404). The 1981 regulation was upheld
