APPLICATION COMPLETENESS CHECKLIST

- This application does not include any confidential information and no application materials are marked confidential. (Pay particular attention to drawings, figures, diagrams, and specification sheets from manufacturers, as these are more likely to be stamped confidential.)
- This application does include confidential information, and the appropriate request for confidentiality in accordance with Title 115 – Rules of Practice and Procedure is provided.
- The application is typed or was completed with a black ink pen.
- One (1) original and one (1) copy** of the complete application will be sent to the proper address. If an electronic version of the application is submitted, one original and one paper copy are still required. If confidentiality is requested, you must submit one original and one copy of the version of the application that includes the confidential material and one original of the public version of the application package. The public version excludes the material that you wish to have kept confidential.
- The relevant sections have been duly marked at the beginning of this form and filled out completely to the best of my ability.
- The Source Description is in narrative format and discusses, at a minimum, the source’s processes, emission points, and emissions (Form 1.0, Section 1.2, Line 55).
- Source Layout Diagram shows locations of all buildings, property boundary, stacks, emission points and or units, access points, and adjacent roads (Form 1.0, Section 1.2, Line 56).

NDEQ FACILITY ID#: _____

- Process Flow Diagram shows how materials flow into and through each process. All emission points are shown and labeled (Form 1.0, Section 1.2, Line 57).
- The original application is signed and dated by the responsible official (Form 1.0, Section 1.2, Line 63).
- Yes No Air Dispersion Modeling Analysis was conducted for a construction permit and the results reviewed by the NDEQ (Form 1.0, Section 1.2, Line 59).
- Yes N/A Air pollution control equipment for each emission point is identified and described (Form 2.0, Section 2.1).
- Yes N/A Emission point/stack information is identified and described (Form 2.0, Section 2.1).
- Yes N/A Emissions Summary Tables – calculations of potential and actual emissions of all regulated air pollutants – are provided. Units of measurement are included, and all supporting documentation, such as emission factors, equations, and the source of the emission factors(e.g. AP-42, FIRE, etc) are provided (Form 3.0, Section 3.1).
- I have included additional attachments that are clearly marked with the Form and Section number the information is associated with, source name, and NDEQ facility identification number (these may be handwritten).
Note: NDEQ recommends listing and/or describing additional attachments in a cover letter.

CERTIFICATION STATEMENT

- I have completed this application checklist and can attest the accompanying operating permit application materials are complete to the best of my ability.
- In completing this form, I understand the following:
 - If any of the required information is not included in this application submittal, the application will be placed in a suspended file until NDEQ receives the necessary materials and information.
 - Completion of this checklist does not assure this is a complete application, and NDEQ may request additional information to complete the permit.
 - By indicating this application does not include confidential information, the application will be placed in the public files and be subject to public review.
 - Application review will not commence until all required information is received and the application is determined to be complete.
