If your facility is located in Omaha or Lancaster County, you must submit a notification to the appropriate local air pollution control agency and Region VII EPA.

\* An existing source was constructed or reconstructed prior to April 2, 2002.

\*\* A new source commenced construction or reconstruction after April 2, 2002. A new source may use the Notification of Construction/Reconstruction, if relevant, to satisfy the Initial Notification requirements.

Provide a brief description of the source (include nature, size, design, and method of operation):

\_\_\_\_\_

Identify the emission points applicable to this standard:

\_\_\_\_\_

Identify the hazardous air pollutants emitted from the applicable emission points:

\_\_\_\_\_

**Compliance Dates**

- Existing sources must be in compliance with this standard by February 5, 2007.
- New sources must be in compliance with this standard by February 3, 2004 or upon startup, whichever is later.

Check the box that applies:

- Facility is a major source of hazardous air pollutants (HAPs).
- Facility is an area source of HAPs.
- Source classification is unknown.

**NOTE:** A major source is a facility that has a potential to emit greater than 10 tons per year of any single HAP or 25 tons per year of multiple HAPs. All other sources are area sources. The major/area source determination is based on all HAP emission points inside that facility fence line, not just the sweat furnace(s).

**Print or type the name and title of the Responsible Official for the facility:**
